Subject: In need of a good PSE&G contact

Hi guys. We are running into some trouble dealing with PSE&G regarding the poles and power lines on Sussex St. alongside Building A. Basically a bit of the run around. We need an evaluation of the poles and wires and the guy wire and then we need them to make some changes with the guy wire (which is connected to the building facade) and to address (insulate, de-energize, isolate, etc) the power lines to protect the men and equipment that will be working near them during demo. We have applied for their help but getting their interest in the project has been challenging. I think what we need is a heavy hitter in their organization who can help us and I was wondering if any of you know someone like that or know someone at PSE&G who can get us to that person. Unfortunately schedule delays may be looming if we don't move this forward.

Thanks for

Dave
